- ☆ This week, part of the sidewalk on the southwest side of Broad Street was removed for electrical ductbank signalization work. Alternate crews will be in this location next week for more ductbank work and repouring of the traffic pedestal. Please approach this area with caution as conditions will change.
- ☆ Next week, curbing and water lateral installations will begin on the King Street side of the Lining House.
- ☆ At Berlin's Entrance driveway, 90% of the electrical conduit work is complete. Upon finishing this work next week, curbing and sub-base & pavers for this driveway area will be installed.
- ☆ Water laterals were placed this week at 121-123 King Street. The same curbing, sub-base & pavers work described above applies here. See below for information on an electrical disruption next week.
- ☆ This week, the bluestone sidewalk was established in front of Tellis Pharmacy and 127 King Street. The Tellis Parking Lot driveway remains under construction next week. Also next week on June 2nd between 9 am to 12 pm, there will be a power outage to relocate electrical handholds at 121-123 King Street and Tellis Pharmacy. Thank you for your patience.
- ☆ At 145 King Street, the bluestone has been set at the south entrance to the building. Caulking and burnishing will follow in the near future.
- ☆ VEHICLES EXITING THE 93 QUEEN STREET GARAGE *MUST* TURN LEFT UPON EXITING THE GARAGE.
- ☆ There are *tentative* plans next week to begin working in the SCE&G entrance from King Street. This area must be demoed in anticipation of an electrical ductbank installation and the construction of a transformer pad. Upon closure of the entrance, vehicles will be detoured to the Meeting Street entrance by accessing Broad Street via King Street and turning left onto Meeting Street. Parking spaces across King Street from this entrance will be closed to vehicles for construction equipment. It is also possible at some point that it might become necessary to close the parking lot driveway to the Library Society. If and when this occurs, daily and visitor parkers must proceed to the 93 Queen Street Garage for free parking. Please remember to sign the back of the ticket adding Library Society to the signature.
- ☆ This week in and around Joint Venture Jewelry, the curb was placed and setting of the bluestone and handicap ramp is underway and on-going.
- ☆ Crosswalk installation is occurring at Clifford & King Streets so this area will remain closed. Electrical ductbank work continues towards Archdale Street and will continue for two more weeks. A 2-inch unmarked water service was broken on Thursday with disruption to Clifford Street businesses and residences. Water service was restored at 2 pm. Please accept our apologies for the inconvenience.
- ☆ The new water main tie-in work between Princess & Fulton Streets will be completed this week and the trench covered in flowable fill and asphalt.
- ☆ The crosswalk on the southeast corner of the King/Market intersection will open Friday, May 29th. Next week, the southwest corner next to Saks Fifth Avenue will be closed for demo and crosswalk installation.

Our grand business is not to see what lies dimly at a distance, but to do what lies clearly at hand.

Thomas Carlyle
